

## Purdicom helps M24Seven light up UK businesses with wireless gigabit connectivity

As one of the UK's most advanced Internet Service Providers, M24Seven has proved example for other ISPs to follow by offering a calculated hybrid mix of wired and wireless technologies to deliver B2B connections.

### A GROWING NEED FOR SUPERFAST BROADBAND

Based in Manchester, M24Seven has played an active role in the Government's Connection Vouchers scheme, where business can receive a grant of up to £3,000 for superfast broadband. M24Seven were the leading provider when the scheme piloted across 5 UK cities in 2013. Since the scheme has been launched it has extended into 22 cities and M24Seven has become the 2nd highest provider of connection vouchers nationwide through providing connectivity via wireless & fibre to businesses.

M24Seven now connects around 1500 businesses using entirely it's own wireless or fibre infrastructure

independently from BT or any other third-party providers. This has led M24Seven to achieve over £1million recurring revenues per month, take it's employee count to over 100 and expand their wireless network across more cities in the UK. The management team recently led a secondary management buyout injecting £45m into the business backed by LivingBridge.

*“Purdicom is unlike any distributor in its class, the support we get is excellent both commercially and technically. Our customers are using our Siklu and Ceragon connectivity solutions, to enjoy all the benefits of superfast Internet connectivity.”*

## PURDICOM PROVIDING A TRUE VALUE ADDED SERVICE

In early 2013, M24Seven completed an agreement with Purdicom to supply the rapidly growing ISP with some of the leading wireless technologies that sits on its portfolio. Later in the year the deal was further enhanced when Purdicom reached an agreement with M24Seven to supply 32GHz Managed Spectrum Services and systems that Purdicom have exclusive access to. This allowed M24Seven to rapidly deploy licensed microwave systems, bypassing Ofcom and saving time and money meaning they can connect customers even faster.

As a Purdicom partner, M24Seven is able to utilise financial and inventorial resources through Purdicom. With M24Seven's customer connection demand ramping up each month, Purdicom maintain allocated stock levels for M24Seven including replacement stock reducing lead times and slashing RMA process delays.

“Purdicom is unlike any distributor in its class, the support we get is excellent both commercially and technically. Our customers are using our connectivity solutions, built on Siklu and Ceragon infrastructure and supplied by Purdicom, to enjoy all the benefits of superfast Internet connectivity. We see this partnership taking us much further”, said James McCall, Director of Strategic Development at M24Seven . “Through access to Purdicom's resources, stock and financial facilities coupled with Siklu and Ceragon's unmatched technology, its helped us stay at the forefront of our industry.”

M24Seven now have the largest installed base of Siklu Communications MMW systems in UK with hundreds of links deployed across the country. With the massive expansion plans that M24Seven have, all parties expect this number to continue to grow rapidly.
