

## Hospitality: Hotels, Clubs & Pubs

### 1. Wi-Fi Access Points

#### Cambium Networks cnPilot

cnPilot 802.11ac Wave 2 Wi-Fi products with advanced management capabilities deliver high capacity and fast installation and price performance.

### 2. Network Switching & Management

#### Cambium cnMatrix & cnMaestro

Use cnMatrix™ with Cambium's cnMaestro™ cloud management platform for a zero-touch experience which maintains both ease of management, robust security and reduces costs.

### 3. Encapto Guest Captive Portal

#### Encapto Wi-Fi

Encapto's ground breaking software enables you to monetise your Wi-Fi hotspot via payment gateways and serve targeted advertisements based on data captured from your users in real time.

### 4. WatchGuard Secure Wi-Fi Networks

#### Wireless Intrusion Prevention Systems (WIPS) & Firewall

WIPS security sensors can be added to your current Wi-Fi deployment with ease. Couple that with firewalls to add a layer of network security that ensures you'll be protected from external malicious attacks.

### 5. UPS Safety Power Backup

#### CertaUPS

An uninterrupted power supply will provide you with short term power to keep you online. Reduce the risk of costly downtime and lost data.

# Hospitality: Caravan Parks

## 1. Cambium Networks Point to Point (PtP)

### Cambium PtP & PtMP Radios or ePMP

PTP and PMP links can also be used to serve as a lower CAP/OPEX leased line replacement. ePMP works perfectly in dense environments.

## 2. Wi-Fi Access Points, Switching & Management

### Cambium cnPilot, cnMaxtrix, cnMaestro

cnPilot 802.11ac Wave 2 Wi-Fi products with advanced management capabilities deliver high capacity and fast installation and price performance.

## 3. Managed Wi-Fi

### Nomadix Managed Wi-Fi

Nomadix Managed Wi-Fi is the perfect solution, where carrier-grade Wi-Fi needs to be combined with subscriber and bandwidth management.

## 4. Encapto Guest Captive Portal

### Encapto Wi-Fi

Encapto's ground breaking software enables you to monetise your Wi-Fi hotspot and provides a facility for marketing.

## 5. WatchGuard Secure Wi-Fi Networks

### Wireless Intrusion Prevention Systems (WIPS) & Firewall

WIPS security sensors can be added to your current Wi-Fi deployment. Couple that with firewalls to add a layer of network security.

## 6. UPS Safety Power Backup

### CertaUPS

An uninterrupted power supply will provide you with short term power to keep you online. Reduce the risk of costly downtime and lost data.
