## MILEAGE ZONES

Instead of a charge per driven mile there is now a standard charge based on which zone the engineer is traveling to, anything outside of Zone 4 will be a bespoke cost which Technical will clarify should it be needed.

## TERMS & CONDITIONS

- Overnight charges may apply if the distance is more than 100 miles from the Purdicom Offices.
- Aborted days (not including poor weather or reasons that are deemed preventable or caused by us e.g. incorrect tools/mounting equipment) will be charged at 75% of the day rate, an example of this would be our inability to gain site access due to the reasons beyond our control would attract this aborted charge.
- The above costs are Labour charges and don't include materials (except where specified), these can be advised at the time of the works
- All surveys are only deemed accurate at the time of the survey and Purdicom will not be held liable for the outcome after this time.
- All Purdicom engineering time is provided as a consultative service only not a guaranteed fix.
- All areas of access e.g. roof must be deemed safe prior to visit of the engineer. If the engineer feels the environment is unsafe any works will be aborted but still charged.
- If MEWPS are required equipment and operator must be provided by the customer at time of service or arranged by the account manager using our preferred supplier
- In restricted or sensitive areas, the customer must provide an escort for our engineers while on-site.
- Must use PRDI-Labour for any preferred suppliers
